- Auto-production of the album "You are leaving the rational sector" (2012).
- Videos realization for the tracks Aria and 90/00, production Pomona Entertainment.
- Important live activity beside bands like Sud Sound System and 24 Grana.

Information

At the source of the Scat project, no claim of musical genre, no intention of being part of a mainstream, no wish to absolutely be alternative: just the research of our own expressivity.

Scat's journey starts and developps among rock, blues and psychedelic. Since the auto-production of the album "La vita regolata dal caso" (2005), it takes a new direction, giving more importance to instrumental parts. With the release "Il muro dopo Nagasaki" (2009), Scat goes beyond the previous phase of research, and reaches a more conscious instrumental approach, a modern and dark shaded narration, where scratching melodies and strange sounds cross oneiric recitative-songs, free from easy schemes.

The upcoming album, "You are leaving the rational sector" (2012) will be a new step in this evolution: the introduction of new elements, like the violin, makes the Scat project more and more unclassifiable, remaining however at the borders of what's called "rock".
